DX & Postage Solutions

"The **opti**mail DX brings efficiency and design into your mailroom"

The **opti**mail DX has the added feature of DX post ready. Full accounting, reporting and printing facilities so you can always be sure you are in control of your postage spend. At the touch of a button simply switch between your Royal Mail postage account and your DX account. The **opti**mail's high quality ink ribbon will frank your company logo or message perfectly every time.

- Easy selection of Royal Mail and DX
- Prints DX sender details and date stamp
- Cost accounts your postage and DX usage
- Simple and clear display screen saves you time - at the touch of a button switch between your Royal Mail indicia and your DX sender details

The **opti**mail DX provides big performances in an 'operator friendly' package

The **opti**mail DX is a professional electronic postage meter capable of franking 40 letters per minute. The contemporary design of the **opti**mail looks good in any office environment, it efficiently processes your mail and is a welcome addition to any mailroom.

The clearly laid out keypad controls all metering functions. Easy and quick to use, the **opti**mail allows you the freedom to get on with other things in your busy day!

"Cost control has never been simpler with the **opti**mail"

Start the day well

Includes an electronic incoming mail date and time stamp. Select from five different formats to stamp the incoming mail.

Frank, record and report your DX and postage spend easily with the ultimail DX

The clear and easy to read extra large display screen of the ultimail DX allows you to navigate through its functions with ease. At the touch of a button you can switch between your Royal Mail postage indicia and your DX sender details.

The ultimail DX is the first multicarrier postage meter fully equipped for the opening of the UK postage market in 2006.

- Franks, records and reports your DX and postage spend
- Large clear screen makes navigation through functions simple
- Easily switchable from Royal Mail and DX
- Full accounting and reporting facility
- The first Multicarrier postage system

With ultimail DX you can always be sure of what you are spending.

ultimail - uncompromising performance from the beginning

A modular design enables you to configure your ultimail according to your individual needs. Choose from two basic models - ultimail 60 (60 letters / minute) or ultimail 90 (90 letters / minute), then select from a variety of options to build the system you need.

Anything is possible, if you are looking for uncompromising efficiency and ease of operation.

First aid: First class.

An integrated software-based "Help" function offers easy-to-understand instruction in the display at the press of a button. The modem can be used to instantaneously diagnose errors and faults remotely, and your dealer's FP service number is available to meet any other needs.
