

FPI 2000

Table-top inserter series

FPI 2015

FPI 2020

FPI 2025

One for all.
Attractive, handy, fast and
truly simple to use.

A plus for every office

Put an end to the daily mail stress! Let your new personal assistant deal with all the mail you used to collate, fold and insert by hand: The new FPI 2000 table-top mail inserter. Quickly and easily gets business letters, advertising mailings, invoices, pay slips and other documents into the mail – with or without enclosures.

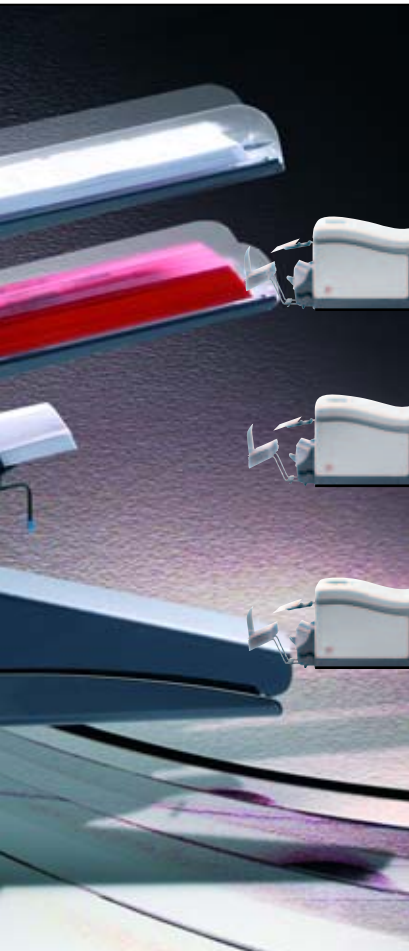

The new **FPI 2000** series of table-top mail inserters will win you over with its ease of operation and reliability. The system can fold documents of various sizes to fit into C6, C6/5 and C5 envelopes.

Or use the folding function alone – for instance, to produce brochures or flyers. The series lends itself to a variety of applications – be it the daily miscellaneous mail to multi-part mass mailings. Small formats, pre-folded materials, reply cards or return envelopes can be added to letters quickly and easily.

Conceived for small to moderate quantities of mail, the **FPI 2000** series is remarkably quiet in operation (according to sound emission standard ISO 11203).

Table-top inserter series

Versatility – from the daily mail to mass mailings

The **FPi 2000** series delivers an innovative design adapted to meeting your individual mailing needs. Up to three automatic feeder stations provide maximum versatility and capacity. The series consists of the **FPi 2015**, **FPi 2020** and **FPi 2025** models.

FPi 2015 features one automatic A4 document station that feeds material page by page. A second automatic station feeds envelope-shaped enclosures (up to A5).

FPi 2020 is equipped with two automatic A4 document stations which can be set up to feed A4 formats as well as envelope-shaped enclosures (brochures, flyers, reply cards or envelopes).

FPi 2025 consists of two automatic A4 document stations plus an enclosure feeder for assembling multi-part mailings (for example letter, flyer plus reply vehicle; up to A5).

Daily mail function

Each model includes a manual feed for handling the daily mail. It enables the operator to feed up to five sheets of paper (loose or stapled) by hand and add an automatically-fed enclosure, if desired.

Feeder-Swap

Inserters equipped with more than one document station can be set up for uninterrupted operation when processing high-volume single-item mailings with or without enclosure. When one station empties, the other station starts automatically, enabling the first to be refilled without pause.

Multi-page feeds

Each automatic document station can be set to feed several sheets per envelope. Feed, fold and insert up to three sheets per job, or up to five sheets when using OMR.

Options

OMR

Automatic optical mark recognition (OMR). The inserter can "read" coded marks on the documents to reliably determine the number and sequence of documents intended for a single addressee. Especially useful for mailing multi-page invoices.

High-volume envelope hopper

Eases the collection of finished envelopes. Time and space saving design delivers filled envelopes to an extra-large side-mounted envelope hopper.

Outstanding features for ease of operation, flexibility and reliability

fill & start

fill & start

The fill & start feature enables anyone to operate the system without special training. Simply select desired functions and let the machine complete all necessary material measurements and adjustments before starting the job. Settings for specific tasks can be saved in the programmable nine-job memory.

real sheet control

real sheet control

The safest and most reliable double-feed detector in this inserter class. Performs an actual measurement of the paper's thickness, eliminating false double-feed messages that document colors and printing can produce with optical detecting sensors. The automatic double-feed detector can be turned off for specific jobs or in each individual feeder.

5 in one

five in one

The **FPi 2000** inserters are built around a sturdy yet quiet folding mechanism that can neatly fold up to five sheets of material – in varying sizes, loose or stapled.

interactive display

The user-friendly control panel is another distinctive features of the **FPi 2000** series of inserters. Folding and inserting functions are shown in the easy-to-read display screen and can be selected at the push of a button. Parameters for up to nine different jobs (settings for document composition, type of fold, fold location, document alignment, address location) can be saved and automatically retrieved.

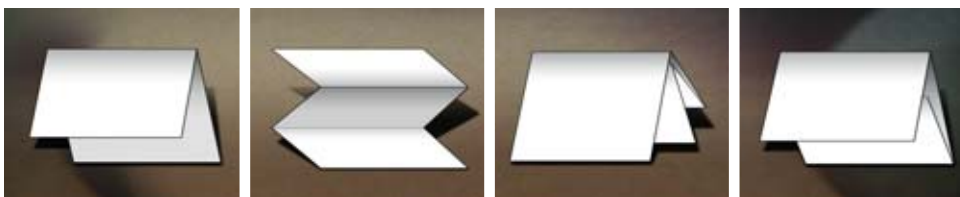

easy access

And in the event that a document or envelope should get stuck despite the machine's intelligent sensors, just raise the hinged lid for easy access to the inserter's interior. The jammed document can be quickly and cleanly removed undamaged.

Functions			
Automatic feeder stations	2*	2*	3
A4 feeder stations	1	2	2
Multiple document feed (A4 station)	yes	yes	yes
Feeder-swap (depending on document size)	yes	yes	yes
Manual feed for up to five sheets	yes	yes	yes
Feed supplementary document (envelope-sized)	yes	yes	yes
Feed a second supplementary document (envelope-sized)	no	no	yes
Programmable job memory	9	9	9
Item counter (job/total)	yes	yes	yes
fill & start function	yes	yes	yes
real sheet control	yes	yes	yes
Quiet operation for office environment (ISO 11203)	yes	yes	yes
Options			
OMR	no	no	yes
Side exit with extra capacity envelope hopper	yes	yes	yes
Side exit envelope output for on-line franking machine connection	yes	yes	yes
	*model cannot be upgraded (to "2020" or "2025")		

The right fold transforms an A4 document into a handy brochure and a perfect mailing.

Every kind of commonly-used fold can be selected: Single-fold, zig-zag fold, double-parallel fold or C-fold (l to r).

FPI 2000

Table-top inserter series

Specifications

Document feed

Document width	130 to 230 mm
Document height	90 to 356 mm
Paper quality	60 g/qm to 250 g/qm (coated/uncoated)
Capacity	325 sheets per station (80 g/qm paper)
Sheets/weight with multiple-feed	5 sheets 80 g/qm with enclosure

Supplement feed

Small formats or pre-folded supplements	Length 130 to 230 mm Width 90 to 156 mm
Capacity	Up to 325 single-sheet supplements (80 g/qm paper)

Envelopes

	With or without address window
Sizes	Length 90 to 162 mm Width 165 to 248 mm
Capacity	150 envelopes

Folding and inserting performance

Folding	5 sheets maximum (80 g/qm paper)
Inserting	2,200 letters/hour (max)

Programmable job memory

9

Dimensions

FPI 2020 (w/h/l)	420 x 520 x 1200 mm
