IMS-300
Digital Franking Machine

Every business needs to operate as efficiently as possible, even daily routine tasks should be performed in a productive manner.

The easy to use IMS-300 digital franking machine guarantees that every piece of mail you send costs significantly less than if you paid using stamps.

Automatic downloads of postal rate changes and software upgrades means you will always be up to date with the latest information.

Correct value postage – every letter, every time

The IMS-300 incorporates a 5Kg integral weighing platform, freeing up desk space and guaranteeing that each letter or package bears the correct postage value. Differential weighing technology enables batches of mixed mail to be processed quickly and efficiently. The differential mail feature means that a collection of mail can be placed on the scale and the machine will calculate the correct postage for each mail piece as it is removed from the pile

Information management

It's crucial for businesses to account for postage expenses. Departmental or client postage spend can be easily tracked and reported with the 100 accounts available on the IMS-300.

Strengthen your brand with targeted and effective mailing

Transform your mail into eye-catching communications. Advertise your business on every mail piece with sharp inkjet printing to build your professional image. Print a return address or message alongside your customised slogan to ensure undelivered mail is returned thus improving the accuracy of your mailing database and ultimately reducing expenditure on subsequent mail shots. These are easily entered via a built-in qwerty keyboard.

Easy to use

Up to ten presets minimise preparation time for common jobs. Seal and frank your envelopes at the same time, resulting in a professional ready to mail document. And if you're always rushing to meet deadlines, you can advance the date and prepare mail reading for sending later in the week – perfect if you've time spare today and a hundred and one things need to be mailed out tomorrow.

Print promotional message on every envelope you frank

Don't just save you money; turn your mail into a powerful revenue-generating tool

Get you mail opened and read

Printing a promotional message on every envelope you frank ensures your mail is more likely to be opened and read ahead of mail sent by your competitors. On top of this, our advanced ink-jet technology produces a professional impression every time. It's a simple and cost-effective way of letting customers and potential customers know you company has high standards.

No more queuing for stamps

Re-credit your franking machine at the touch of a button. And get up to 55 days free credit by taking advantage of Purchase Power, the PB post now and pay later service.

A gateway to the future

The IMS-300's digital indicia satisfies all current postal regulations, and the technology's flexibility makes the IMS-300 adaptable for the future.
